

Preface

The 6th International Conference on Renewable Energy Technologies (ICRET 2020) was held in Perth, Australia during January 8-10, 2020. It is an annual research conference focuses on timely and emerging topics of interest to the Renewable Energy Technologies and provides an opportunity for in-depth exchange of research ideas.

In the morning of Jan. 9, 2020, keynote speeches were delivered by renowned scholars. They shared their new research perspectives with our conference attendees, which highlighted the conference program. In the afternoon, the authors' presentations were divided into 4 sessions with topics on Energy Engineering and Sustainable Development, Power System and Energy, Battery Technology and Energy Storage Materials and Engineering Materials and Building Energy Consumption respectively. The authors prepared well to show their best. We truly believe that participants had fruitful discussions, and enjoyed the opportunity for future collaborations.

For the conference proceedings, each paper was peer-reviewed by the technical committee. Due to the hard work of the committee, ICRET has a high-quality proceeding each year. On behalf of the organizing committee, I would like to express my sincere appreciation to Conference Chair, Program Chairs and Technical Committee Members. Their excellent professional advice enabled us to prepare this high-quality program. The special thanks also go to every author, ICRET cannot be held successfully without their support and attendance. Every participant had a wonderful time at the conference and enjoyed the beautiful scenery in Perth, Australia.

We are looking forward to welcoming you in next ICRET.

Best regards,

Program Chair,
Prof. Hee je Kim,
Pusan National University, South Korea
