Preface

SPATIAL DATA 2021 - is the annual international scientific conference organized by Moscow State University of Geodesy and Cartography (MIIGAiK) with the partner participation of leading industrial companies, federal control authorities in the field of spatial data.

The goal of the conference is to form an international platform for scholars and researchers from various scientific fields using spatial data as unique characteristics of objects and phenomena of the surrounding world.

Spatial Data 2022 traditionally takes place in MIIGAiK (Moscow, Russia). It includes almost 6 scientific sections. Each section is devoted to a certain field of fundamental and applied sciences for the researchers from the globe.
